

KHALID AKHTER

Address: #291, 6th Cross Road, Gandhipuram,
Whitefield, Bengaluru, Karnataka
Pin- 560066

Contact No: (+91) 9430969786, 9661897568

Email: akhter.bharat@gmail.com

Professional Summary

Detail-oriented and results-driven SQL Server 2022, and Dot NET Developer with 16+ years of experience designing, developing, and maintaining enterprise applications using C#, ASP.NET (Core & MVC), Dot Net Core RESTful API, Entity Framework Core, React and Angular. Skilled in building robust front-end, back-end logic, writing complex T-SQL queries, and developing scalable RESTful services. Strong expertise in stored procedures, functions, indexing, performance tuning, and data modeling. Experienced in Agile/Scrum environments with a solid understanding of SDLC, clean architecture, and SOLID principles, version control using Git, and deployment using Azure DevOps. Passionate about writing clean, maintainable code and delivering solutions that drive business value.

Proficient in leveraging **Generative AI tools** (ChatGPT, Copilot, Azure OpenAI, Perplexity MCP Server, Agentic SDLC) to accelerate coding, query tuning, and documentation within **SQL Server Management Studio 2022, Visual Studio, and VS Code** environments.

SKILLS

Generative AI Tools: GitHub Copilot, ChatGPT, Perplexity, Azure OpenAI, Prompt Engineering
Agentic Tools: Custom tools sdhc-dataplatform etc

Primary Skills

.Net Core MVC 4 Entity Framework using C#

Languages: C#, JavaScript

Frameworks: .NET Core, ASP.NET Core MVC, Entity Framework Core (DB First)

Dapper, Factory Pattern, Repository Pattern, SOLID Principle

Clean Architecture, Middleware, Filter, CORS, JWT, X-CSRF, DI,

Caching, Throttling, Compression, Swagger, WorkerService.

API tuning.

Tools: MS Visual Studio, Git, Postman, Azure DevOps

Design Patterns: MVC, Repository Pattern, Dependency Injection

Primary Skills

Dot Net Core RESTful Web API (6.0/8.0) using C#

Web APIs: RESTful API, JSON, Swagger

Authentication & Authorization (JWT, OAuth2)

CORS, Entity Framework Core, Dapper,

Middleware, Filters, Exception Handling

Dependency Injection, Repository Pattern

Azure App Services & Azure SQL

GIT, Azure App Service, DevOps

Primary Skills

Database Developer:

SQL Server 2008- 2022, Installation, Configuration, Backup & Recovery, Normalization, Table, View, Store Procedure, Function, Trigger, Indexing, Data Types, Sequence, SQL Job using Agent, ETL using SSIS Package, Replication, Database Job, Linked Server, Performance Tuning

ACID concept, DML, DDL, DCL (Role/permission), Indexing (clustered/non-clustered), Joining, Set Operation, Query Optimization, DML Trigger, DDL Trigger, Window command like row_number(), dense_rank() etc,

Secondary Skills

Front-end technologies like React 18+ (JavaScript), Angular 2/4/6/7 (TypeScript)

Frontend: HTML5, CSS3

Proficient in back-end technologies like MySQL, MongoDB, PostgreSQL.

proficient in Dockerization of .Net Core API (C#), React, Angular, NodeJS

proficient in DevOps to create workflows for source code management (Bit Bucket) to ensure efficiency and cut down on human error and develop and maintain CI/CD methodologies to speed the development process through automation.

Proficient in Jenkins, OpenShift 4, Bit Bucket, GIT, JFrog Artifacts

I am passionate about learning new skills and staying updated with the latest trends in web development.

WORK HISTORY

Clients	Duration
Odyssey (Parent Company: gyansys.com)	June 2025 – Sep 2025
Wabash (Parent Company: gyansys.com)	Dec 2024– May 2025
Applied Materials (Parent Company: gyansys.com)	Nov 2019– Dec 2024
NF Indian Railway	May 2016 – Jul 2019
American Health Care (California) (Parent Company: Telecommand Software Pvt. Ltd)	Feb 2014 – May 2016
HCL Technology, Kolkata	Apr 2013 – Feb 2014
Telecommand Software Pvt. Ltd,	Apr 2009 – Feb 2013

WORK EXPERIENCE

Client: Odyssey

June 2025 – Sep 2025

Parent Company: gyansys.com

Role: Data Engineer / Analyst

Responsibilities:

- Data Migration from MySQL to SQL Server for the different Application.
 - Creating Staging environments using SSIS Package.
 - Creating SSIS package, Data Flow, Task Flow to move data from MySQL to SQL Server.
 - SSIS package Data cleaning, conversion, filtering
 - Creating fact and dimensions as per new system (DB and Application)
- Move data from fact and dimensions to the new System

Client: WABASH

Dec 2024 – May 2025

Parent Company: gyansys.com

Project: Scanner Project, Part Warehouse

Role: Senior Software Developer

Responsibilities:

- Designed and implemented the frontend using React.js with reusable components and responsive UI.
- Built RESTful APIs in Node.js to handle warehouse operations such as stock in/out, stock moving from one location to another location or one warehouse to another warehouse, the parts movement either by single or multiple parts using scanner to scan the product details.
- Integrated with backend AS400 for data storage and optimized queries for performance.
- Implemented authentication & authorization using JWT to ensure secure access for warehouse staff.
- Deployed the application on Azure.
- Collaborated with stakeholders to gather requirements and translated them into technical solutions.

Client: Applied Material (Bengaluru)

Nov 2019– Nov 2024

Parent Company: gyansys.com

Role: Principal Consultant

Responsibilities:

- Managing Resource and task
- Project Plan
- Managing Sprint (Jira)
- Documentation & Architecture

- Database management (Table/View/SP/Function/Trigger/Job)
- RESTful API using .Net Core API 6.0 & C#
- Unit Testing using xUnit,
- Code Coverage
- Smart Logging in RESTful API
- Splunk Integration with API
- Replication with dependency team from SQL to Hadoop
- Communication to cross functional team (Pareto Team, Attunity, Hadoop)
- Docker Containerization for .Net API, ReactJS
- Jenkins Pipeline CICD
- Deployment cutover activity
- Postproduction Support

Client: Telesoft/ NF Indian Railway

May 2016 – Jul 2019

Role: Technical Lead

Responsibilities:

- Developing Banking Software
- Requirements & Analysis
- Design and Architect
- Using Angular 6 for UI
- Typescript 1.7.5
- Creating .Net Core API using C#
- Creating Database (Table/View/SP/Function/Trigger)
- Deployment on IIS server
- Creating all type of Accounts
- Creating all type of transactions

Client: American Health Care (California)

Feb 2014 – May 2016

Parent Company: telecommand.com

Role: Technical Lead

Responsibilities:

- Requirement, Analysis & Estimation,
- Creating Project Plan sprint wise.
- UI Requirement development by the team
- Handling .Net Core API, Communicating the cross functional team or dependency team, working on CICD Jenkins pipeline, OpenShift4,
- Managing Database, table, SP Function, Store Procedure, Trigger, Job etc.
- Source code management (Git Hub)
- Managing the project
- UAT script, Cut over activities like upload database/Table/SP,
- Data Migration, cut over activities, GO -Live and Hypercare Support.

Client: HCL Technology

Apr 2013 – Feb 2014

Role: Technical Lead

Responsibilities:

- Build UI component with .Net MVC 4.
- Working on Model, View and Controller using C#
- Using LINQ query to fetch data from SQL Database
- Managing Database SQL Server 2012, Table/View/SP/Trigger/Linked Server
- Creating API middle level layer using .net API.

Client: Telecommand Software and Services

Jan 2009 – Apr 2013

Role: Senior Software Developer

Responsibilities:

- Working on Datawarehouse,
- ETL from various format like excel, CSV, Access, Flat file etc into SQL Server 2012.
- Using SSIS (SQL Server Integration Service) to load data from different format to SQL.
- Generating Report using SSRS (SQL Service Reporting Service)
- Generating report using BIRT tool.
- Creating ASP application as front-end.
- Creating desktop application using VB6 and Access/SQL Server.
- SQL Script writing for data loading from scratch to reports i.e., the flat files have been provided by different clients to load data into staging area as flat tables and generating the reports for the concerned clients. The project provided different reports for the patients as well as MIS report for the client.
- SQL Script writing for data loading from flat file to staging area and staging are to SQL Server 2005.
- Type of flat files : .txt, .xls, .mdb, .dbf, ect.
- Incremental Data Loading into the system from staging tables to SQL Server 2005.
- Writing queries, procedure, function and creating synonyms for the MS Reporting System.
- Designing & Creating Report for MDR system.

EDUCATIONAL BACKGROUND

- Master of Computer Application: University of Nort Bengal (NBU)
- Master of Science (Electronic): BNMU University (Bihar)

CERTIFICATION:

- AZ-104 (Azure Administrator Associate)
Completion Date: 13th September, 2025.
